

THE WORLD'S LEADING PORT NETWORK

WHAT MAKES HUTCHISON PORTS THE WORLD'S LEADING PORT NETWORK

Hutchison Ports is a global port investor, developer and operator with a workforce of more than 30,000 people worldwide.

The group operates across five continents and handles approximately 10 per cent of global containerised marine cargo trade.

Our network of ports is strategically located at key ports along the most important trade lanes in the world today. We have built a solid foundation and put in place a strong and balanced portfolio that is evenly distributed throughout all regions, creating a portfolio that is resilient, especially in times of volatility. We have become a lean, efficient and result-oriented organisation via working smart and improving workflows.

We offer a comprehensive network with a vast suite of services and constant technological transformation while maintaining reliable, robust and flexible operations has been the centre of our 'Smart Port Strategy.' The strategic use of latest technology enable us to adapt shifting trade patterns and maximise efficiency through our global network of ports which brings flexibility and confidence to our customers.

This constantly growing suite of services and best-in-class terminal operating practices provide a sustainable operating ecosystem across our terminal to operate smarter.

As we move forward, we will continue to operate sustainably in a way that we will continue to fulfil the needs of society with minimum adverse impact to our people, our environment and our business.

YOUR
PARTNERS

Hutchison Ports has led the port industry for over five decades, setting standards for efficiency, innovation and service, wherever in the world we operate.

UNITY is what we stand for and it sums up our values as a network. It is the word that best describes who we are, how we operate and why we are the industry leaders. UNITY also helps to explain Hutchison Ports' leadership role in this complex interconnected world and have long been inherent in the group's DNA.

As the world's leading port network, we will continue to lead across our network, strengthening our position and delivering best on what matters most to all our customers, partners and employees.

BUILDING FOR THE FUTURE

ASIA & AUSTRALASIA

Hutchison Ports has its heaviest concentration of terminals in Asia and Australasia. These have developed over the years in tune with shifting manufacturing bases and growing infrastructure.

From the trade arteries of Northeast Asia to the Special Economic Zones of China and the industrial heartlands of Southeast Asia. We have deployed some of the most advanced terminal equipment in the region to meet increasing mega-vessels calling our deep-water berths terminals. The group's first Regional Operations Centre, mixed mode Autonomous Truck operations and AI technology development are all introduced in the same region offering greater flexibility to customers, provide eco-friendly business environment and energy saving solutions.

Hutchison Ports has some of the most extensive mega-vessel handling facilities with remote-control and automated equipment supported by the latest technology and capable of handling multiple mega-vessels simultaneously setting a benchmark in its category.

MIDDLE EAST & AFRICA

Hutchison Ports is strategically located in a number of growing and emerging markets in the Middle East and Africa. We have made significant contributions and investments to the development of the ports we operate. Our growing network in the region facilitates both local and international trade to the countries in which we operate and expand their industrial bases.

With an increase demand of cold chain facilities, Hutchison Ports' terminals offer automated temperature-controlled facilities with extensive warehouse logistics connections and utilises green energy where possible to ensure a sustainable operations.

The group will continue to collaborate with local developer to develop, operate and explore new business opportunities to expand the group's portfolio.

EUROPE

Hutchison Ports has a significant presence in Europe where it operates some of its most environmentally friendly and technologically advanced container terminals, including the group's first semi-automated terminal.

These large-scale terminal facilities that are bolstered by a network of inland feeder terminals and connections to ports spread across Europe and North Africa. The favourable geographical location of its many deep-water terminals is supplemented by end-to-end value-added services and the expansion of facilities capable of handling all variety of cargo.

Our ports are located in the heartlands of Europe's rapidly growing distribution regions and leading industrial centres lies an extended network of multimodal feeder hubs. It offers a wide range of connections to the seaports and our inland terminals via an extensive intermodal transport network spanning the rest of Europe.

THE AMERICAS

Hutchison Ports' portfolio in the Americas has its highest concentration of terminals in Mexico where it offers a wide-range of services and diverse operations handling a variety of cargo and vessel types. The country's attractiveness as a manufacturing destination, with proximity to the US market serves as a gateway to the Pacific Coast of the US and Mexico as well as Central and South America.

Our Americas network also includes a number of ports serving as a transshipment hub in Panama, located at both ends of the Panama Canal in Balboa and Cristobal serving along the transatlantic and transpacific routes. A deep-water container port in the Bahamas, Freeport, connecting the eastern seaboard of the US and the principal east/west line trade lanes throughout the region.

We will continue to invest in advanced technological facilities equipped with automated green solutions leading to a sustainable and efficient operation to the Latin America and the Caribbean.

SMART PORT STRATEGY

Hutchison Ports set the standard for technological advancement to port operations and has roll out many inventive terminal developments and projects throughout its network of ports. These cutting-edge developments have resulted in improved cost efficiency, increased productivity and reduced downtime. The benefits range from lower 'long-term' operating costs, energy efficiency, greener credentials and better staff welfare.

All these groundbreaking state-of-the-art technological achievements are part of the group's 'Smart Port Strategy' incorporating standardisation, automation, digitisation and organisations. It has been the bedrock of the group's modernisation development. Our proactive approach to adopt smart technology and automated equipment demonstrates the commitment to improve efficiency and productivity, reducing costs and enhancing sustainable port operations.

One of the latest development is Hutchison Ports' Terminal Operating System modernisation programme 'Veronica'. It leverages a suite of innovative smart features and capabilities specifically designed to enhance port efficiency, sustainability and competitiveness. 'Veronica' harnesses the power of technology, incorporating cloud computing, blockchain, digitisation, AI, machine learning and automated equipment to expedite the flow of data internally and externally creating a smart ecosystem that is driven by a modern integrated supply chain network.

TOGETHER WE CAN MAKE IT HAPPEN

Hutchison Ports strives to be “The preferred partner for a sustainable supply chain”. This vision is focused on working in collaboration with our colleagues, customers, suppliers, and contractors, to engage with our supply chain.

The group have incorporated three pillars of sustainable development to ‘Our People, Our Environment and Our Business’ as our sustainability approach.

‘Our People’ are our strength. We are fully supportive of our colleagues’ career journey and development, whilst ensuring that our teams are inclusive, diverse and representative. We also engage in activities supporting our communities.

We are committed to protecting the environment and to mitigate any adverse impacts caused by our operations. The group has adopted scientific strategy of reducing operational emissions and deploying the latest emissions reduction technology to ‘Our Environment.’

A vision to become ‘The preferred partner for a sustainable supply chain’ to ‘Our Business’ has always been Hutchison Ports priority. Through adopting innovation technology to our business and collaborative partnership with customers, we are building smarter ports and operate intelligently.

Hutchison Ports has obtained the approval from the Science Based Targets initiative (SBTi) for its greenhouse gas emissions reduction and 2050 net-zero targets, which are in line with the trajectory to limit global warming to 1.5°C above pre-industrial levels.
